Chipco® GREEN can be applied year round to golf courses.

Chipco® GREEN is a contact fungicide containing iprodione which has curative, preventative and curative activity and is effective against a range of turf diseases. Its special liquid formulation is ‘rainfast’ within 1 hour and can prevent the build-up of morning dew on grass leaves. Chipco® GREEN belongs to the dicarboxamide class of chemistry. There has been no record of managed resistance to CHIPCO® GREEN developing in turf diseases. In 2018, 114,500 ha were treated with CHIPCO® GREEN containing iprodione and in 2019, 113,700 ha were treated.

Standard precautions should be used when applying CHIPCO® GREEN.

**FUNGICIDE**

CHIPCO® GREEN may be contra-indicated in certain situations. Consult your local Bayer representative or Bayer CropScience for further information.

**SAFETY PRECAUTIONS**

**Operator Protection**

CHIPCO® GREEN contains potential allergens and is a skin and eye irritant. It is a skin sensitizer. 

**Personal Protective Equipment**

CHIPCO® GREEN enhances the risk of respiratory sensitization and may produce skin sensitization. Potential allergens may include: 1,2-benzisothiazolin-3-one. May produce an allergic reaction. 

**Environmental Protection**

CHIPCO® GREEN may be harmful to aquatic organisms, and poses a moderate risk to freshwater and marine ecosystems. 

**Disposal Requirements**

CHIPCO® GREEN is a potential allergen. Proper disposal practices should be used to prevent environmental transfer. 

**Restrictions**

CHIPCO® GREEN is a contact fungicide containing iprodione which has curative, preventative and curative activity and is effective against a range of turf diseases. Its special liquid formulation is ‘rainfast’ within 1 hour and can prevent the build-up of morning dew on grass leaves. Chipco® GREEN belongs to the dicarboxamide class of chemistry. CHIPCO® GREEN has been registered for use in the following countries: (in parentheses are the names of the countries where CHIPCO® GREEN is registered): Germany, Denmark, Sweden, Austria, Belgium, Ireland, Canada, USA, China, Australia, Switzerland and New Zealand.

CHIPCO® GREEN is manufactured in China by Bayer CropScience Ltd. (Shanghai) with iprodione as active ingredient.

CHIPCO® GREEN is distributed in the following countries: USA, Canada, China, Australia, Switzerland and New Zealand.

CHIPCO® GREEN is a trademark of the Bayer group of companies.
SAFETY PRECAUTIONS

Operator Protection

- Always wear protective clothing and eye protection. If skin contact or inhalation occurs, seek medical advice immediately.

- Always wash hands after handling.

- Protect clothing by wearing non-absorbent disposable overalls.

- Use of personal protective equipment is recommended. If you provide a scale or higher standard of protection.

- Keep out of reach of children.

Environmental Protection

- Disposal of this product should be carried out in such a manner as not to cause pollution of the environment.

- Avoid applying this product near water courses.

- Do not contaminate water with the product or its container. Do not clean application equipment near surface water.

- Avoid contamination via drains from farmyards and roads.

- Do not allow direct spray from horizontal boom sprayers to fall within 5 m of the top of the bank of a static or flowing water body, unless a Local Environment Risk Assessment for Pesticides (LERAP) permits a narrower buffer zone, or within 1 m of the top of a ditch which is dry at the time of application. Do not allow direct spray from hand-held sprayers to fall within 1 m of the top of the bank of a static or flowing water body.

- This product qualifies for inclusion within the Local Environment Risk Assessment for Pesticides (LERAP) scheme. Before each spraying operation from a horizontal boom sprayer, either a LERAP must be carried out in accordance with CRD’s published guidance or the statutory buffer zone must be maintained. The results of the LERAP must be recorded and kept available for three years.

- To avoid the development of resistance, a resistance management strategy should be adopted. This strategy needs to be different chemical group that are effective against the target disease, as well as non chemical methods of control. Bayer recommends responsible product stewardship to ensure effective long term control of the fungal diseases in this list.

- For control of Red Thread, Fusarium Patch and Dollar spot. Useful reduction of Anthracnose, Rust and Leaf spot where present at time of application.

- Tank mix or rotation of CHIPCO® GREEN with approved products from different chemical group is recommended to provide a useful reduction for when present at time of application against the other listed diseases.

- Do not contaminate water with the product or its container. Do not clean application equipment near surface water. Avoid contamination via drains from farmyards and roads.

- Do not allow direct spray from horizontal boom sprayers to fall within 5 m of the top of the bank of a static or flowing water body, unless a Local Environment Risk Assessment for Pesticides (LERAP) permits a narrower buffer zone, or within 1 m of the top of a ditch which is dry at the time of application. Do not allow direct spray from hand-held sprayers to fall within 1 m of the top of the bank of a static or flowing water body.

- Do not use on golf fairways patch treatment of up to 5% of the total area).

- To protect aquatic organisms respect an unsprayed buffer zone to surface water bodies in line with LERAP requirements.

- This product qualifies for inclusion within the Local Environment Risk Assessment for Pesticides (LERAP) scheme. Before each spraying operation from a horizontal boom sprayer, either a LERAP must be carried out in accordance with CRD’s published guidance or the statutory buffer zone must be maintained. For 24 hour emergency information contact Bayer CropScience Limited

Warning

Do not touch or inhale concentrated products. Do not inhale spray mist. Avoid contact with eyes and skin, do not swallow. Wash hands thoroughly after using. Store out of the reach of children. Warning signs: Perchlorate. Contains perchlorate. Do not contaminate water, food or feed by storage or disposal. Dispose of un wanted products by disposal to a licensed hazardous waste disposal contractor. If swallowed get medical advice/attention. If eye contact occurs wash with lots of water. If skin contact occurs wash with lots of water. IF exposed or concerned: Get medical advice/attention. Do not re-use container for any purpose. WASH OUT CONTAINER THOROUGHLY and dispose of safely.

CHIPCO® GREEN belongs to the dicarboxamide class of fungicides. There has been no record of managed resistance to dicarboxamides being observed in Europe (CHIPCO® GREEN). CHIPCO® GREEN is a non-selective, broad spectrum fungicide which is effective against a range of turf diseases. It is also useful as a preventative in maximising disease control. This product may be used for the control of Red Thread, Fusarium Patch and Dollar spot. Useful reduction of Anthracnose, Rust and Leaf spot where present at time of application.

CHIPCO® GREEN can be applied year round to golf courses. Preventative: Apply at monthly intervals. Curative: Apply at the first sign of disease and repeat as necessary at intervals of 1 month or greater. TIMING OF APPLICATION: For control of Red Thread, Fusarium Patch and Dollar spot. Useful reduction of Anthracnose, Rust and Leaf spot where present at time of application.

CHIPCO® GREEN can be applied year round to managed amenity turf (When used on golf fairways patch treatment of up to 5% of the total area). For control of Red Thread, Fusarium Patch and Dollar spot. Useful reduction of Anthracnose, Rust and Leaf spot where present at time of application.

CHIPCO® GREEN is a contact fungicide containing iprodione which has curative and preventative action against a range of turf diseases. Its special liquid formulation is ‘rainfast’ within 1 hour and can prevent the build-up of morning dew on grass leaves. Suitable to use on all types of turf.

**SAFETY PRECAUTIONS**

** Operator Protection **

- Personal protective equipment required and must be worn at all times when handling the product.
- Protective eyewear, rubber gloves and rubber boots must be worn.
- Avoid breathing dust, mist or fumes and use ventilated equipment or exhaust extraction where possible.
- Wash out all spray equipment thoroughly with water immediately after use.

** Environmental Protection **

- Do not spray on days with heavy rainfall or if the wind is likely to carry spray drift to other vegetation.
- Do not use in or around watercourses or aquatic habitats.

**EFFECTS OF EXPOSURE**

- In case of accident or if you feel unwell seek medical advice immediately (show the label where possible).
- When using do not eat drink or smoke.

**TAKE OFF IMMEDIATELY** heavily contaminated clothing.

**Operator Protection**

** SAFETY PRECAUTIONS**

- Engineering control of operator exposure must be used where reasonably practicable in addition to the following personal protective equipment.

- **SAFETY PRECAUTIONS**

  - To protect aquatic organisms respect an unsprayed buffer zone to surface water bodies in line with LERAP requirements.
  - Environment Risk Assessment for Pesticides (LERAP) permits a narrower buffer zone, or within 1 m of the top of a ditch which is dry at the time of application. DO NOT ALLOW DIRECT SPRAY from hand-held sprayers to fall within 1 m of the top of the bank of a static or flowing water body.

This product qualifies for inclusion within the Local Environment Risk Assessment for Pesticides (LERAP) scheme. Before each spraying operation from a horizontal boom sprayer, either a LERAP must be carried out in accordance with CRD’ s published guidance or the statutory buffer zone must be maintained. The results of the LERAP must be recorded and kept available for three years.

**PRECAUTIONS**

- To avoid the development of resistance, a resistance management strategy should be adopted. This strategy recommends a rotation of chemicals. There has been no record of managed resistance to iprodione in CHIPCO® GREEN.

**APPLICATION**

- CHIPCO® GREEN can be applied year round to golf courses. Preventative: Apply at monthly intervals.

**APPLICATION RATE**

- At the rate of 10 ml CHIPCO® GREEN per 100 m² 10 L CHIPCO® GREEN per ha

**MIXING AND SPRAYING**

- CHIPCO® GREEN is a suspension concentrate and must be thoroughly mixed before use. It is recommended that the contents of the bottle are thoroughly mixed prior to use. For use on (a) commercial and residential lawns up to 200 m² and patch treatment up to 5% of estate lawns of up to 230 Cambridge Science Park, CB4 0WB Cambridge.

**Precautions for use**

- CHIPCO® GREEN contains a number of fungicide components. Each has its own individual safety data sheet. Special local conditions must be considered when selecting the correct product.

**STORAGE AND DISPOSAL**

- Store under cover in the dark in a dry and well ventilated place.

- Mix thoroughly and make up to the required volume with water. Maintain adequate agitation during application and continue agitation at all times during spraying and stoppages until the tank is completely empty.

- WASH OUT ALL SPRAY EQUIPMENT THOROUGHLY WITH WATER IMMEDIATELY AFTER USE.

**REMARKS**

- CHIPCO® GREEN is a contact fungicide containing iprodione which has curative and preventative action against a range of turf diseases in special local conditions. It is suitable for use on all types of turf. It is recommended that the contents of the bottle are thoroughly mixed prior to use. For use on (a) commercial and residential lawns up to 200 m² and patch treatment up to 5% of estate lawns of up to 230 Cambridge Science Park, CB4 0WB Cambridge.

**WASHING INSTRUCTIONS**

- To avoid the development of resistance, a resistance management strategy should be adopted. This strategy recommends a rotation of chemicals. There has been no record of managed resistance to iprodione in CHIPCO® GREEN.
